

Additional Files: Practical.h, AddressUtility.c, DieWithMessage.c

Client Compilation: gcc -std=gnu99 UDPEchoClient.c AddressUtility.c DieWithMessage.c Practical.h

Server Compilation: gcc -std=gnu99 UDPEchoServer.c AddressUtility.c DieWithMessage.c Practical.h

Client Command line: <Server Name> <Message> <Port>

Server Command Line: <Port>

What I had to pass for Client: 192.168.1.127 "Hello" 5555

What I had to pass for Server: 5555

```
UDPClient — -bash — 91x25
Gavins-MacBook-Pro:UDPClient gavintaylormcroy$ cd ..
Gavins-MacBook-Pro:Desktop gavintaylormcroy$ pwd
/Users/gavintaylormcroy/Desktop
Gavins-MacBook-Pro:Desktop gavintaylormcroy$ ./TCPEchoClient
Parameter(s): <Server Address/Name> <Echo Word> [<Server Port/Service>]
Gavins-MacBook-Pro:Desktop gavintaylormcroy$ cd Client
-bash: cd: Client: No such file or directory
